JARVIS (HUNG-TING) LIN

Phoenix, AZ 85029 | (623) 300-4182 | jarvislintggc@gmail.com | linkedin.com/in/jarvis-lin-42071b344

PROFESSIONAL SUMMARY

Trilingual supply chain and operations professional with an ASU M.S. in Supply Chain Management and four years of hands-on business experience in Japan. Built and operated multiple ventures that generated 1M+ in cumulative gross revenue over approximately three years, while directly managing sourcing, suppliers, inventory, pricing, fulfillment, and daily operations. Brings practical Taiwanese and Japanese business fluency plus current research on Arizona's semiconductor supply chain.

EXPERIENCE

Taiwan–Arizona Semiconductor Corridor Research *Phoenix, Arizona*
Independent Research & Product Developer *Feb 2026 – Present*

- Developed an interactive Arizona–Taiwan market intelligence platform that brings together semiconductor supply-chain companies, commercial areas, institutions, and field observations in one accessible map.
- Applied existing ecosystem frameworks and research-center classifications to organize public information and support more structured analysis of Taiwanese companies considering Arizona.
- Turned research findings into practical tools that can support business development, market entry discussions, and Arizona–Taiwan industry engagement.

Moses Lakes Semiconductor Industry – Returnable Asset Optimization & Agentic AI (Capstone) *Mesa, Arizona*
Supply Chain Project Consultant *Jan 2026 – May 2026*

- Delivered a zero-cost AI prototype to optimize a 20M+ returnable fleet (drums and totes) without RFID or GPS hardware, modeling ~5% working-capital savings (~$1.5M) and reframing the company's approach to asset tracking and allocation.
- Built a digital twin and simulation-based system to optimize returnable asset allocation under demand uncertainty, applying operations research methodologies.
- Improved asset utilization and reduced stockout risk, enhancing service level reliability.
- Designed ETL pipelines and modular architecture for real-time visibility and scalable decision-making, integrating Python and SQL for data processing.
- Integrated agentic AI decision support via API into the system, generating adaptive strategies that respond to policy changes and unpredictable disruptions in real time.

Entrepreneurial Operations - Multiple Businesses *Tokyo, Japan*
Founder / Co-Founder / Operations Lead *Aug 2020 – Apr 2024*
Yuki Professional PC Studio | Mrs. Angel Restaurant | Crispy Chicken N' Tomato Campus Launch | Yan Jian Yu Cha

- Built and operated e-commerce, restaurant, campus retail, and delivery ventures entirely in Japanese, generating 1M+ in cumulative gross revenue across all businesses before graduation.
- Managed end-to-end procurement, supplier negotiation, inventory, demand planning, pricing, fulfillment, marketing, customer service, and small-team operations.
- Reduced total operating costs by 28% by redesigning a restaurant supply chain to an outsourced model after make-or-buy and total-cost-of-ownership analysis.
- Launched a brand's first university-campus location through site planning, vendor coordination, and go-to-market execution

EDUCATION

Arizona State University - W.P. Carey School of Business *Phoenix, Arizona*
Master of Science, Supply Chain Management (STEM-designated) *Aug 2025 – May 2026*

Kokushikan University *Tokyo, Japan*
Bachelor of Business Administration *Apr 2020 – Apr 2023*

- Awarded scholarship of 1M JPY for three consecutive years.
- Dissertation: *The Possibility of NFTs as a Secondary Issuance Market for Corporate Profits in the Metaverse* — selected for publication in Kokushikan University Business Administration Thesis Collection.

SKILLS

Supply Chain & Operations: Procurement, supplier management, inventory and demand planning, logistics, operations improvement, project coordination, cross-border business development, market-entry research, stakeholder engagement

Systems & Tools: ERP systems (SAP, Oracle — coursework exposure), Python, SQL, Power BI, Tableau, Excel (advanced), Monte Carlo simulation, ETL pipeline design, Data Mining, Customer Segmentation & Performance Benchmarking, AWS basics, AI tools (Codex, VS Code) for analysis and research.

Language Skills: Native Chinese • Japanese (JLPT N1, Professional Working Proficiency) • English (IELTS 7.0, Professional Working Proficiency).
